

Extended Hours US Equity CFDs

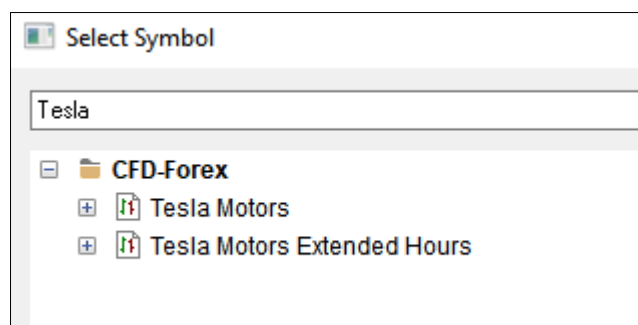

Extended-hours trading refers to trading that occurs outside of regular trading hours. Regular trading hours for stocks traded on US exchanges are from 15:30 CET to 22:00 CET. Extended-hours trading sessions start before (pre-market) and after (after-hours) the regular trading hours.

For some popular US stocks WH SelfInvest offers extended hours trading starting from 10:00 CET in the morning up until 2:00 CET in the night. In total this selection of stocks can be traded for 16 hours from Monday-Friday:

Pre-Market	Regular trading hours	After-hours
10:00 - 15:30	15:30 - 22:00	22:00 - 02:00

How to trade Extended Hours stocks?

You can find all available Extended Hours stocks in our NanoTrader platform, the web platform or in our mobile apps by selecting "US Equities (Extended Hours)" from the instrument menu or searching for a company and choosing the market labelled "Extended Hours".

Important: All extended hours CFDs are separate instruments and available in addition to the normal CFDs, which are only tradable during the regular trading hours. By keeping it separate from our normal offering, we can ensure that orders of traders, who do not want to trade the extended hours, are not triggered by the extended hours prices.
